

The BSM Leadership Summit: Empowering practice leaders to reach new heights.

WHY CHOOSE US?

We have a 40-year history of **guiding practices** through a variety of leadership opportunities within healthcare organizations. We have the **expertise you need** to develop leaders who are aligned with your business goals.

HOW WE WORK

Through this program, physicians, administrators, and other practice leaders will be challenged to **gain a deeper awareness** of leadership strengths and opportunities and identify how these can be leveraged to **create successful teams and businesses**.

The Summit Experience

The BSM Leadership Summit is designed exclusively for a limited number of participants. With less than 20 practice leaders in each session, this small group setting **creates a dynamic environment** for peer to peer learnings and ongoing support.

Prior to the Summit, participants will **participate in two leadership assessments** including a 360 degree feedback survey, as well as a one-on-one call with one of BSM’s certified professional coaches.

Each Summit session include 2 ½ days of **highly interactive workshops** designed to help participants apply insights from their leadership assessment pre-work through facilitated discussions and “real world” leadership case studies.

Is this program right for you?

Participants who benefit the most from the Leadership Summit often share the following characteristics:

- Commitment to growth and learning
- Demonstrated investment in own leadership development
- Willingness and openness to change, and new ideas in how to achieve business goals

Physician and administrator “pairings” can also be a combination for success in applying insights and learnings to their practices, following the Summit.
